Walking The Long Long Road To Captivity

German prisoners, as far as the eye can see, are marched through the ruined streets of Aachen on their way to a prison camp after surrender of the besieged city by the German garrisons.

Has Success

New Emergency Runway Material Assessed By Air Force Engineers
Air Force engineers were glad to announce that the new emergency runway material with the essential advantages of steel mat.
It consists of a layer of cloth between two layers of tar-soaked paper. It can be carried in one-third the space and laid by machine, almost twice as fast.

Spread over a rolled earth surface, the durable, water-repellent covering contains the heat and shock of landing with little damage, bays down only when sub-surface resistance is excessive.

Developed by the Royal Canadian Engineers and improved by U.S. engineers, FWS was tried for the first time by the 90th Air Force last summer, became a vital factor in the remarkable speed of air supply in Italy.

By Regis it had been used successfully on some 30 forward fighter and transport fields.

Coarse Grains

Farmers Should Arrange For Supplies As Soon As Possible
Because coarse grains will likely be moved off the head of the line as soon as shipping restrictions are imposed by the "Wack" Board: British farmers, farmers who depend on the purchase of feed grains for the next crop have harvested. Wheat and fax shipments have been given preference over oats and barley, with the supply of such grains at the lake head deficient for needs, and at present cutting prices there is no gain to be obtained in holding coarse grains in store.

OUT FOR REVENGE
In a military hospital a visitor saw a badly wounded soldier from one of the Irish regiments. "When you're asked to get the man home," he said.

"He's not going home," said the orderly. "He's going back to the front."

"Back to the front," exclaimed the visitor. "But he's awful sharp."

"Yes," replied the orderly, "and he thinks he knows his own mind."
